

Researching the attitude on health, healthcare and eHealth in a low SES population

General TU Delft data management questions

Name of data management support staff consulted during the preparation of this plan

Jeff Love, the Data Steward of the faculty of IDE

Date of consultation with support staff [YYYY-MM-DD]

2020-04-06

1. Is TU Delft the lead institution for this project?

- Yes, leading the collaboration

2. If you leave TU Delft (or are unavailable), who is going to be responsible for the data resulting from this project?

Valentijn Visch (V.T.Visch@tudelft.nl)

3. Where will the data (and code, if applicable) be stored and backed-up during the project lifetime?

- SURFdrive
- Project Storage at TU Delft

4. How much data storage will you require during the project lifetime?

- < 250 GB

5. What data will be shared in a research data repository?

- All data (and code) produced in the project

6. How much of your data will be shared in a research data repository?

- < 100 GB

7. How will you share your research data (and code)?

- Data will be uploaded to another data repository (please provide details below)

The data of this project will be uploaded for sharing on the DANS EASY database. This because the data that we are producing will mainly fall in the psychology/sociology/anthropology realm, which makes it applicable to the Social Science archive.

8. Does your research involve human subjects?

- Yes

9. Will you process any personal data? Tick all that apply

- Other types of personal data – please explain below

We will collect personal views on health, healthcare and ehealth

TU Delft questions about management of personal research data

1. Please detail what type of personal data you will collect, for what purpose, how you will store and protect that data, and who has access to the data.

Please provide your answer in the table below. Add an extra row for every new type of data processed:

Type of data	How will the data be collected?	Purpose of processing	Storage location	Who will have access to the data
Insights, Opinions, Views and beliefs	Online focus group	To determine the attitude of the community members towards health, healthcare and ehealth.	TU Delft project drive	The project team (promotor: Valentijn Visch, daily supervisor: Jos Kraal and external partner: Rita van den Berg-Emmons)

2. Will you be sharing personal data with individuals/organisations outside of the EEA (European Economic Area)?

- No

3. What is the legal ground for personal data processing?

- Informed consent - please describe the informed consent procedures you will follow

Before starting the online focus groups, the participants will be sent a link to an online informed consent form and information sheet.

4. Will the personal data be shared with others after the end of the research project, and if so, how and for what purpose?

No

5. Does the processing of the personal data results in a high risk to the data subjects?

If the processing of the personal data results in a high risk to the data subjects, it is required to perform a Data Protection Impact Assessment (DPIA). In order to determine if there is a high risk for the data subjects, please check if any of the options below that are applicable to the processing of the personal data during your research (check all that apply).

If two or more of the options listed below apply, you will have to [complete the DPIA](#). Please get in touch with the privacy team: privacy-tud@tudelft.nl to receive support with DPIA. If only one of the options listed below applies, your project might need a DPIA. Please get in touch with the privacy team: privacy-tud@tudelft.nl to get advice as to whether DPIA is necessary.

If you have any additional comments, please add them in the box below.

- None of the above apply
